Allowable Subject Matter

Claims 1-28 are allowed.

The following is an examiner's statement of reasons for allowance:

The cited prior art does not farley teach or suggest the claimed invention of test automation systems are used to automatically test software-driven systems conventional architectures consist of a test harness, which is typically used to execute test cases specified by attributes of the test cases. Specifically, claims 1, 8, 15 and 22 are directed to a test harness that is arranged to provide system test services for the test methods and smart attributes that are arranged in a hierarchy that comprises method level attributes that are arranged to modify parameters of a test method and modify execution of the test method, and parameter level attributes that are arranged to modify the parameter input to the test method and to modify a state of an object after the test method has executed and utilizing the test case scenario object, the test harness and the smart attributes by executing instructions on the processor to test the electronic system. Therefore, claimed invention improves on same code often needs to be written (or modified) for each different test harness in which the attribute is use and attributes can be reused and new attributes added without requiring modifications to test harnesses in order run tests

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
